SUMMARY

Full-Stack Developer specialized in building scalable, secure web applications using **Node.js (MERN)**. Experienced in designing robust REST APIs, managing relational and non-relational databases (MongoDB, MySQL, PostgreSQL), and leveraging cloud infrastructure to deliver high-performance digital solutions.

EXPERIENCE

Avyukt Core Technology

April 2026-July 2026

Full Stack Developer Intern

Remote

– Project Management Platform

- Developed and integrated RESTful APIs for task management, dependencies, and scheduling; built dynamic frontend features for project creation and workflow management.
- Designed key features including Project Planning (tasks, dependencies, scheduling), routing/navigation, and contributed to modules like Gantt charts, milestones, and sprint planning.
- Developed permission matrix APIs for assigning, updating, and validating user roles and permissions.
- **Tech Stack:** React.js, Node.js, Express.js, Tailwind CSS, Redux

– Human Resource Management Platform(HRMS)

- Developed OTP-based email verification workflow for user registration and password reset.
- Designed and implemented dynamic forms with configurable field validation and reusable form components.
- Implemented RESTful APIs for payroll management, salary structures, and payroll processing workflows.
- **Tech Stack:** React.js, Node.js, Express.js, Tailwind CSS, Redux

EDUCATION

Barak Valley Engineering College (BVEC), Assam

Graduation 2024

B.Tech in Computer Science & Engineering | Sept 2020 – Jul 2024

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript
- **Frontend:** React.js, Next.js, Redux, Tailwind CSS, Shadcn UI
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools & Platforms:** Git, Antigravity, Codex, Linux, Docker, Postman, VS Code, Redux

PROJECTS

BookNest | Independent Project | [Live](#) | [Code](#)

- Designed multi-layer authentication system with email/password registration (OTP verification), JWT token management, Google OAuth 2.0 integration, and role-based access control (user/admin) using custom middleware.
- Integrated **Razorpay** Payment Gateway with backend cryptographic signature validation (SHA-256) to ensure secure e-commerce transactions and prevent checkout tampering.
- Implemented full-text search with case-insensitive MongoDB queries, dynamic filtering (category, price range etc).
- **Tech Stack:** React.js, Redux Toolkit, Tailwind CSS, Node.js, Express, MongoDB, RESTful APIs

Senseai | Independent Project | [Code](#) |

- Built a full-stack resume builder with multi-step form workflow, template selection (Classic/Modern/Minimal), and support for work experience, education, skills, and certifications
- Implemented ATS optimization with resume scoring and feedback to improve job application success rates
- Developed AI-powered cover letter generator using Google Gemini API, creating tailored cover letters based on job descriptions and company profiles
- Tech Stack : Next.js, Clerk, Supabase, Tailwind CSS, Shadcn UI

KEY STRENGTHS

- Expert in building scalable, secure, and responsive web applications using the MERN stack.
